Tom,

Per your request, I have accepted all of the changes. I did not see any gross anomalies in formatting and made only minor changes.

One thing that did stand out was in the second entry for the Hauptmann study, which only presented the AML data from Table 4. (b) (5)

[REDACTED]

I met with David this morning to discuss the sinonasal tables. To date, I have updated over half of the sinonasal tables by going into the original literature. I gave David hardcopies of my work for his review and comments. (b) (5)

[REDACTED] (b) (5) I should have the remainder of the sinonasal tables completed today for his review.

Finally, I now have full access to the 1000s of PDFs in the literature folder on the L drive. Thanks for helping out with that on Friday.

Brian

▼ Thomas Bateson---03/16/2012 04:05:03 PM---I left the tracked change in case you wanted to see them. Otherwise, please accept all the changes,

I left the tracked change in case you wanted to see them.

Otherwise, please accept all the changes, and check the formatting layout once more for anything that looks off.

Thanks,
Tom
